JL.D Mampang Prapatan, South Jakarta.

Frontend-focused Full-Stack Engineer with over a year of production experience building scalable web applications across media, e-commerce, and enterprise domains. Specialized in React.js, Next.js, and TypeScript, with hands-on backend exposure in Golang and Node.js — delivering full-cycle features in close collaboration with cross-functional teams. Computer Science graduate from Universitas Paramadina.

## Work Experiences

**IDStar - Placement at Kacamatamoo - The Bellagio Mansion**, South Jakarta, Jakarta, Indonesia.

Dec 2025 - Jun 2026

*Fullstack Engineer*

- Integrating the CMS (built with React frontend and Golang Gin backend) with the company's internal ERP system for real-time synchronization of product data, stock availability, and store catalog information.
- Building a recommendation matrix management interface using React with configurable user and product attributes, priority logic adjustment for business needs, and numerical threshold parameters per product category, powered by a Golang Gin REST API.
- Developing an internal user account management module with role-based access control, alongside a responsive and intuitive React-based CMS interface designed for non-technical users, with Golang Gin handling authentication and authorization services.

**Fakta.com - Pancoran**, South Jakarta, Jakarta, Indonesia.

Jan 2025 - Aug 2025

*Frontend Developer*

- Revamped legacy CMS into a fully responsive, modern UI (Next.js + TypeScript + Tailwind CSS), improving editorial workflow speed and cross-device usability.
- Built News Management, UGC moderation pipeline, and multi-asset Media Dashboard — consolidating fragmented editorial tools into one platform used daily by the team.
- Implemented RBAC (4 roles) and interactive analytics dashboards, giving stakeholders real-time visibility into content performance and securing feature access

**PT Sarimurni - Setiabudi**, South Jakarta, Jakarta, Indonesia.

Oct 2024 - Oct 2025

*Frontend Developer*

- Digitized 100% of employee training by building an LMS (React.js + TypeScript), eliminating all manual HR learning workflows for internal staff and external partners.
- Delivered PWA optimization (offline access + push notifications) and bulk enrollment features, enabling training continuity in low-connectivity environments.
- Automated user onboarding via attendance-system integration and enforced RBAC (3 roles), cutting HR admin overhead and securing platform access.

## Education Level

**Universitas Paramadina - Mabes Hankam**, East Jakarta

Sep 2020 - Jan 2025

*Bachelor of Computer Science, 3.39/4.00*

- Participated in the MSIB (Certified Internship & Independent Study) program under the Ministry of Education's Merdeka Campus initiative.
- Contributed technology solutions to support learning activities at PKBM 31 and PKBM 21 Jakarta as part of Community Service Committee.

## Organisational Experience

**HIMTI - East Jakarta**

Jan 2023 - Jan 2024

*IT Division Member*

- Built and managed the official registration website for HIMTI and ASIG annual events, handling participant data collection end-to-end.
- Taught two sessions at the KOBIT IT Learning Community on 'Basics of Web Design' and 'Introducing Frontend Engineering', sharing practical knowledge with fellow students
- Supported coordination and operations for IT Fest, contributing to event execution across multiple departments.

## Skills, Achievements & Other Experience

- Hard Skills:** TypeScript, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Shadcn UI, HERO UI, Golang, Node.js (Express.js, NestJS), Git, GitLab, VS Code, Postman, Figma, Agile / Scrum.
- 3rd Place the Hackathon** (2023): Won 3rd place in a hackathon competition themed "Optimizing the Potential of Future Technology:

Exploring New Business Opportunities in the Age of Artificial Intelligence," with the role of Hustler in Team Satset.
